Seminar Overview:

The “students as investigators” approach focuses on actual fire investigation scenes, coupled with interactive classroom dialogue and an exchange of ideas that enhance the students’ skills in examining the fire scene. The program focuses on the elements necessary for documenting the entire scene, the examination and documentation of all potential sources of ignition, determining the fire’s origin, and ultimately identifying the actual heat source, origin and cause of the fire in a thorough, complete and systematic manner.

The instructor has more than 25 yrs fire investigation experience, including testifying in N.J. Superior Court as an expert witness. He has served on numerous fire and law enforcement advisory boards, including NFPA 1033, Standards for the Professional Fire Investigator.

This seminar is approved for N.J. DFS 0.5 FI/FO Technical ceu’s.
